RUBBER P-CLIP (form D)

Clamp with protective rubber lining

The RUBBER P-CLIP clamp compliant with DIN 3016 is recommended for the secure, vibration-damping mounting of pipes, hoses, cable harnesses, corrugated electrical conduits (cable protection), etc. that are prone to chafing and damage. This type of clamp is widely used in, among others: agricultural and construction machinery, combustion engine construction, the railway industry, electrical equipment, household appliances, etc. It is made of a single length of bent steel strip and a rubber lining. The holes at both ends of the strip are reinforced with steel plates, ensuring clamping strength under high mechanical loads. The strip is made of zinc-plated carbon steel (W1) or AISI 304 stainless steel (W4), the profile of EPDM rubber resistant to water, abrasion, temperature changes and ageing. The W4 version is recommended for marine applications. The clamp does not include a bolt, washer or nut. Other clamp sizes and types (form A, B, C, E and F) are available to order – contact Tubes International.

index W1 (carbon galvanised.)	index W4 (AISI 304)	diameter [mm]	width band [mm]	diameter hole [mm]	index W1 (carbon galvanised.)	index W4 (AISI 304)	diameter [mm]	width band [mm]	diameter hole [mm]
