

## INDUSTRIAL FITTINGS - clips, clamps, ferrules

### FLEX-GEAR

Band clamps with spring lock system maintaining constant clamping force. Excellent choice for fluctuating and extreme temperature applications. The rolled-up edges of the band protect the external layer of the hose from damage and ensure even clamping force around the hose. Tightening torque: 5.6 Nm (max. 9.6 Nm).

The band clamp of 847 series is made entirely of stainless steel, whereas the clamp of 843 series has a carbon steel screw coated with a layer of Zn + Cr (III). Band width 9/16".

code (847 series)	code (843 series)	minimum diameter [mm]	maximum diameter [mm]	SAE size
AB-847010	AB-843010	14	27	10
AB-847012	AB-843012	16	32	12

### FLEX-GEAR HD

Band clamps with spring lock system maintaining constant clamping force. Excellent choice for fluctuating and extreme temperature applications. The rolled-up edges of the band protect the external layer of the hose from damage and ensure even clamping force around the hose. Tightening torque: 8.5 Nm (max. 14.1 Nm).

The band clamp of 845 series is made entirely of stainless steel, whereas the clamp of 841 series has a carbon steel screw coated with a layer of Zn + Cr (III). Band width 5/8".

code (845 series)	code (841 series)	minimum diameter [mm]	maximum diameter [mm]	SAE size
