

IBC connectors - barrel adapters

Adaptors made of high-quality, food-safe glass-reinforced polypropylene for use with the most common and widely used plastic drums used for storing raw materials (200 litres). Designed to facilitate the installation of, for example, a suction pump or ball valve (faucet). A tight connection is guaranteed by an o-ring seal on the external thread DIN EN 12713.

Barrel adaptor with DIN EN 12713 male thread / BSP female thread 	index	External thread size DIN EN 12713	BSP female thread size
	AC-IDM056-F075	S56x4	3/4"
	AC-IDM056-F200	S56x4	2"
	AC-IDM064-F075	S64x5	3/4"
	AC-IDM064-F200	S64x5	2"
	AC-IDM070-F075	S70x6	3/4"
AC-IDM070-F200	S70x6	2"	

Barrel adaptor with male thread DIN EN 12713 / CAMLOCK 	index	External thread size DIN EN 12713	CAMLOCK connector type and size
	AC-IDM056-100A	S56x4	A 1"
	AC-IDM064-100A	S64x5	A 1"
AC-IDM070-100A	S70x6	A 1"	

The illustration below shows the three types of threads used in plastic barrels. Adaptors for all three types of connection are available from Tubes International.
