AKBO water guns - BLUE KING, BLUE PRINCESS

drawing	index	connection (inlet)	description
BLUE KING 	AK-MNP11-BL-LOG	GW 1/2" BSP	**High-quality, very ergonomic AKBO BLUE KING water gun with a protective bow guard.** Made of brass; trigger, bow guard and valve parts of stainless steel, guards of EPDM rubber. EPDM (FDA) seal. Features a trigger lock, stepless flow control and quick, easy manual nozzle adjustment. The special flat nozzle design reduces water consumption by 16% compared with standard washing guns without losing cleaning efficiency. It also prevents water dripping even at the widest spray setting. The protective trigger bow guard prevents uncontrolled water flow and damage. A trigger lock for continuous operation is fitted in the lower part of the handle. Greater safety and high durability are ensured by a double valve stem seal. A red arrow on the housing clearly indicates the direction of the water jet. Max. working pressure: 30 bar Max. working temperature: +95°C Weight: 0.88 kg Dimensions: 190 x 145 x 50 mm Flow with standard nozzle: 22.2 l/min (4 bar)
BLUE PRINCESS  AK-BMFT001-BL  AK-BMFTP11-BL	AK-BMFT001-BL (brass)	GW 1/2" BSP	**High-quality, lightweight and economical AKBO BLUE PRINCESS water gun.** Body made of brass (for AK-BRFT001-BL of AISI 316 stainless steel); trigger, bow guard and valve parts of stainless steel. Guards of EPDM rubber, seals of EPDM (for AK-BRFT001-BL viton seal) - FDA. Small size and ergonomic handle mean it sits comfortably in the operator's hand. Quick, easy manual nozzle adjustment. The special flat nozzle design reduces water consumption by 26% compared with standard washing guns without losing cleaning efficiency. It also prevents water dripping. Greater safety and high durability are ensured by a double stem seal. A red arrow on the housing clearly indicates the direction of the water jet. Max. working pressure: 25 bar Max. working temperature: +95°C Weight: 0.46 ÷ 0.59 kg (depending on version) Dimensions: 145 x 94 x 45 mm (brass and steel version) 162 x 122 x 45 mm (version with bow guard) Flow with standard nozzle: 19 l/min (4 bar)
	AK-BMFTP11-BL (brass, with protective bow guard)		
	AK-BRFT001-BL (stainless steel)
