

**WATER SAVER bendable spray nozzle**

A robust water mopping and cleaning nozzle whose flow is regulated by manually deflecting the rubber nozzle (thumb pressure). The flow is closed when the nozzle is not deflected, **saving water and time on the job**. The nozzle is extremely resistant to damage (being stepped on, run over by a vehicle, etc.). WATER SAVER comes in 4 versions with nozzles of different flow rates. Made of brass or stainless steel (AISI 304), nozzle made of black nitrile rubber. Operating pressure up to 7 bar, continuous operating temperature up to +65°C (temporarily up to +100°C). Length 230 mm. Connection with 3/4" BSP female thread.

				
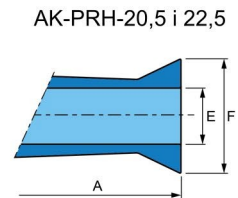

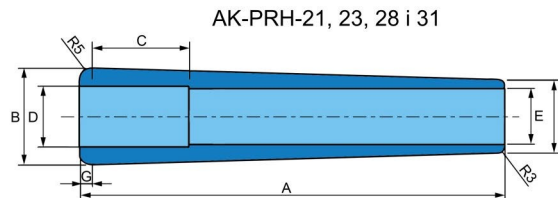

Nozzle diameter / flow rate at 4.5 bar	- / 13 l/min	13 mm / 23 l/min	9 mm / 23 l/min	4.5 mm / 17 l/min

**BLUE NOZZLE bendable spray nozzle**

drawing	index	description
	AK-BWNM045	<b>An economical nozzle for washing and cleaning with water, the flow of which is regulated by manually deflecting the rubber nozzle (thumb pressure). The flow is closed when the nozzle is not deflected, which saves water and time when working.</b> The nozzle is extremely resistant to damage (being stepped on, run over by a vehicle, etc.). Made of blue EPDM rubber and brass. Operating pressure up to 10 bar, continuous operating temperature up to +65°C. Flow rate 13.5 l/min at 2.5 bar. Length 230 mm, diameter 45 mm. Weight 0.28 kg. Connection with 3/4" BSP female thread.

**Covers (holders) for cleaning and washing hoses**

Hose covers (handles) for cleaning and washing hoses protect the end of the hose from excessive bending and make it easier to handle the hose. Made of EPDM rubber.

Photos of covers (handles) for illustration - may differ in shape for some indexes (see drawing, marked in the table below - \*)
