AKBO multifunction gun (2)

Lances for the multifunction AKBO gun

drawing	index	lance length [cm]	description
	AK-LANFC30	30	**Bent stainless steel lance** with nylon foam nozzle, with quick-coupling socket DN11.8 of chromed brass. Intended for washing hard-to-reach surfaces.
	AK-LANFC60	60	
	AK-LANFC90	90	
	AK-LARC030	30	**Bent stainless steel lance with nozzle 2560** (25°, 60 l/min - 20 bar, GZ 1/4" BSPT) for spraying, in a guard, with quick-coupling socket DN11.8 of chromed brass. Intended for washing hard-to-reach surfaces.
	AK-LARC060	60	
	AK-LARC090	90	

Foam generator for the multifunction AKBO gun

drawing	index	description
	AK-TANKC01	**Foam generator:** 1 l tank for cleaning and foaming agent, with injector and foam nozzle, with quick-coupling socket DN11.8 of chromed brass. Combined with the multifunction AKBO gun it forms a set for foaming, spraying or disinfection without using compressed air. Once the foam is produced, it is rinsed off with water using the gun alone. For cleaning small and medium surfaces. Used in industrial kitchens, slaughterhouses, supermarkets and saunas. At the top of the injector there is a knob for manually setting the desired concentration of cleaning agent. The knob can be set to 6 positions, where the individual figures indicate different detergent concentrations: **0** (starting position) - 12%, **1** - 3,5%, **2** - 3%, **4** - 1,5%, **5**- 0,75%
	AK-TANK01-D	Spare part: **1 l tank for cleaning and foaming agent with plastic lid**. The lid prevents evaporation of the solution from the container and accidental spillage of the contents when work is interrupted.

Foam washing with the AK-MNA02-BL gun with fitted AK-TANKC01 foam generator

Rinsing foam with water using the AK-MNA02-BL gun
