

INDUSTRIAL FITTINGS - quick release couplings

CEJN couplings

310 series DN 5.3

Material: Body - brass / zinc-plated steel
 Ferrule, plug - hardened zinc-plated steel
 Valve: brass

Flow rate: Spring and balls: stainless steel,
 925 l/min (Pe = 6 bar, Δp=0.5 bar)
 950 l/min - ESAFE (Pe = 6 bar, Δp=0.5 bar)

Working press.: 16 bar (safety factor 8.75)
Working temp.: From -20°C up to +100°C (NBR)

A single shut-off quick release coupling for general purpose application in industry, mainly in pneumatic systems. For one hand operation with minimum coupling force. Manufactured according to ISO 6150B (MIL C-4109). Available socket versions: STANDARD, ESAFE (vented safety version, vented before disconnection to avoid the risk of sudden separation, complies with ISO 4414 and EN 983 standard), SOFT-LINE (in soft housing, to protect quick release coupling from mechanical impact), MULTI-LINK (for modular connection systems).
