

Skiving machines for hydraulic hoses

FS50

FINN POWER skiving machine is intended for skiving either external or internal rubber layer of the hydraulic skivable hoses in the diameter range 3/16" - 2". Suitable for single-item and series production of hydraulic hose assemblies. The machine is equipped with a foot pedal as a standard which controls operation (switch on/off) and with a manual switch to change the direction of rotation. Driven by three-phase motor 0,75 kW. Weight 34 kg.

The machine comes with a blade holder and with two cutting blades (for external skiving) as a standard. The depth of skiving is adjusted by a special mechanism, with a knob. FS50 skiver is compatible with external skiving mandrels type FSE and internal skiving mandrels type FSI (to be ordered separately). A separate tool rack type FS-RACK is also available (to be ordered separately).

FSE

External skiving mandrels designed for skiving the external rubber layer of hydraulic skivable hoses. Suitable for FINN POWER FS50 tool rack.

FSI

Internal skiving mandrels designed for skiving the internal rubber layer of hydraulic skivable hoses. As a standard the mandrel is supplied with a skiving blade, a ring to adjust the skive length and safety screws. Suitable for FINN POWER FS50 tool rack.
