Nozzles and lances for NiTO COMBI guns

drawing	index	connection	description
	NT-57140A1	NiTO 1/2" quick-coupling plug *	**Short adjustable nozzle** of chromed brass and plastic. Adjusted by rotation. Max. working pressure: 25 bar Max. working temperature: +80°C
	NT-57076A3	NiTO 1/2" quick-coupling plug *	**Lance 17 cm**, **with small nozzle**, plastic, black. Max. working pressure: 25 bar Max. working temperature: +80°C
	NT-57096A3	NiTO 1/2" quick-coupling plug *	**Lance 17 cm**, **with large nozzle**, plastic, blue. Max. working pressure: 25 bar Max. working temperature: +80°C
	NT-57142A3	NiTO 1/2" quick-coupling plug *	**Lance 17 cm**, **with small nozzle**, **metal**, black. Max. working pressure: 25 bar Max. working temperature: +80°C

** - NiTO quick couplings – see INDUSTRIAL FITTINGS, chapter „Brass water quick couplings" and „Stainless water quick couplings"*

Sets NiTO Clean for foam cleaning and washing

Foam cleaning is effective and gives significant economic benefits compared to other methods. A layer of foam is spread over the surface being cleaned using the NiTO Clean device. The device consists of a NiTO gun in COMBI version, a cleaning-agent tank with injector, suction hose and dosing nozzles. The cleaning and foaming liquid is dosed from the tank through nozzles of selected size (from 0.4% to 10% of the specified solution concentration), then flowing through the air-suction injector, forming a foam jet at the injector nozzle outlet. After the cleaning foam effect is achieved, it is washed off with water using the washing nozzle connected to the gun.

NiTO Clean sets with NiTO I COMBI gun

drawing	index	capacity of tank	description
 1,4 l  2,5 l	NT-57087A1	1.4 l	**Foam and washing set:** gun **NiTO I COMBI** (gun index: NT-53105A1), cleaning agent tank with foam injector, suction hose, 17 cm lance with small washing nozzle and set of 15 dosing nozzles. Max. working pressure: 6 bar Max. working temperature: +40°C
	NT-57086A1	2.5 l
