NOTE: For shell clamps for steam end fittings - see the group "Steam end fittings" in the INDUSTRIAL HOSES section. These are special shell clamps made of brass or stainless steel for rubber steam hoses for the installation of special steam ends (clamps RS-635... and RS-637... for DN100, clamps TI-SSC...). Irrespective of the material of manufacture, despite a certain external similarity, the shell clamps for steam should not be confused with the general purpose shell clamps for industrial hoses described here. The latter must not be used for steam!
