Other and special hoses – air supply and exhaust hoses

SPIRAFLEX CSM – to +175°C
SPIRAFLEX SILICONE – to +250°C (350°C)

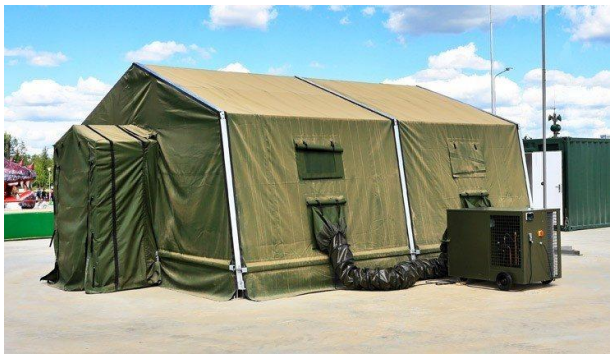
SPIRAFLEX – special versions

Special versions of the SPIRAFLEX hose, differing mainly in the type of fabric and finishing materials used and in the reinforcing spiral pitch, intended for air supply and extraction, hot air, gases, fumes and chemically aggressive vapours. They retain all the properties of SPIRAFLEX hoses, such as: lightness, low weight, small volume when folded, and quick, easy assembly in field conditions. Hose selection in consultation with a Tubes International specialist.

SPIRA-EXHAUST for extraction:
with a dense vacuum-resistant spiral,
PVC (+100°C), CSM (+175°C),
glass fabric (+800°C)

SPIRAFLEX chemical:
versions: **PE** (polyethylene),
PETEF (polyethylene / PTFE),
HYTEF (CSM / PTFE), **PTFE** (PTFE)

SPIRAFLEX antistatic or conductive:
versions: **PE EL** ($R<10^6\ \Omega$),
PVC AS ($R<10^9\ \Omega$), **PTFE EL** ($R<10^6\ \Omega$),
HYTEF EL ($R<10^6\ \Omega$)



SPIRAFLEX CLAMP

Clamp for joining SPIRAFLEX hoses terminated with rings

Clamp for joining SPIRAFLEX hoses terminated with rings. Made of PVC profile, with a galvanised steel tensioning cable. Lock with galvanised steel lever. Width approx. 60 mm.
Provides quick connection and disconnection of SPIRAFLEX hose sections and easy construction of air-supply and ventilation runs in field conditions.
Available to order in many other sizes in the range DN150 – DN1200.

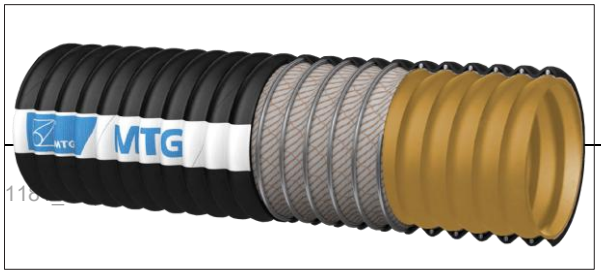
SPIRAFLEX – fitting to pipe stubs

SPIRAFLEX hoses with soft ends can be fitted to stubs and ventilation pipes using classic large-diameter metal clamps. They can also be secured with textile straps with adjustable buckles. SPIRAFLEX hoses can be made with integrated fixing straps sewn onto the hose.

Other and special hoses – road-sweeping hoses



PROFILFLEX

Hose for road sweepers
