

MACHINES AND ACCESSORIES - hose assembly production

ULTRACLEAN devices to clean hoses, pipes and hose assemblies

Types of cleaning projectiles

Standard cleaning projectiles for the ULTRACLEAN devices are available in diameter range from 2 to 150 mm. The projectiles are shot into hoses, pipes or assemblies under pressure and clean their internal surface. The pressure is necessary as the diameter of projectiles is bigger by 20 ÷ 30% than the diameter of hoses, pipes or assemblies. Note: It is recommended to use the cleaning projectile to remove impurity reminders after the application of abrasive or grinding projectiles. In order to match nozzles with adequate projectiles the tables in a user manual have to be followed or experimentally determined.

- Cleaning** - for hoses and pipes; removes small particles of loose impurities.
- Abrasive** - for hoses, pipes and assemblies wherever a layer of scale, rust or other impurities sediment on the inside.
- Grinding** - pipes and assemblies with thicker layer of impurities, scale and rust.
